Rya #21575

Description

Right in the 50’s abstract, Action-painting style, a knot of flowing color radiates across the ecru ground, reaching into two corners. This vintage Swedish Rya rug of exceptionally large size easily competes with the wall art. The pile is long and soft. There are at least 20 distinct colors in the palette. The carpet is not signed, but the artistry is evident. The colors are broken and speckled, with the knot rows adding to the mobile effect.
